

Positioning in a Fixed Dome for Digitalium Models with a 175° Projection Angle

Applicable Digitalium models (with approximate B dimension for diagram):

- Alpha 2/2+ Fixed (32"/81.3cm)
- Delta (14"/35.6cm)
- Delta 2 (15"/38cm)
- Gamma Fixed (32"/81.3cm)
- Zeta Fixed (33.75"/85.7cm)

Example: a 10m diameter dome would have $H = 5m * 0.0437 = 0.219m = 219mm$
